

TABASSUM MUSTAFA AUTHOY

Software Engineer • Researcher • Business Development Manager

Dhaka, Bangladesh | tabassumauthoy123@gmail.com | linkedin.com/in/tabassum-authoy | github.com/TabassumAuthoy123

PROFESSIONAL SUMMARY

A multidisciplinary practitioner working at the intersection of technology, research, and art. Experienced software engineer and Business Development Manager based in Dhaka, Bangladesh, with hands-on experience spanning front-end development, travel OTA platform engineering, UI/UX collaboration, digital platform coordination, and IT-driven business operations. Passionate about technical solution design, building functional web interfaces, coordinating between clients and engineering teams, and researching reliable and trustworthy artificial intelligence systems (reducing hallucinations and uncertainty in LLMs).

PROFESSIONAL EXPERIENCE

Business Development Manager | SoftifyBD Limited, Dhaka

March 2026 – Present

- Promoted from Senior BD Executive within 2 months of joining and confirmed as permanent employee.
- Leads B2B SaaS sales, full-cycle project management, and client consultancy across the company's product portfolio (Faith Trip, ISP Digital, TrackMe, RoadGuard).
- Manages client requirement gathering, technical solution design, enterprise client engagement, and onboarding.
- Undertakes concurrent full-stack development (frontend, backend) of in-house B2B SaaS platforms and drives AI-augmented workflows.

Senior Executive – Business Development & IT | TechSolutions Plex Limited, Dhaka

August 2025 – January 2026

- Supported IT operations across the company's Fanam Trip OTA platform, e-commerce systems (Discount Bazar, Banglar Bike, YEDI), and core digital business platforms.
- Coordinated between technical development teams and management to gather system requirements and implement usability improvements.
- Monitored usability issues, prepared technical reports, system documentation, and conducted stakeholder presentations.
- Mentored junior staff on system usage, tooling, and workflow automation processes.

Front-End Developer & Senior Sales & Agent Support Executive | NZ World Travels, Hybrid

November 2022 – May 2025

- Developed and maintained responsive web pages utilizing HTML, CSS, and Figma-based UI implementation.
- Supported the operations of the OTA platform mynztrip.com, GSA partners, and inventory and accounting integrations.
- Coordinated specifications for third-party API integrations, and conducted regular usability and cross-device bug testing.

IT Industrial Internship (Full-Time) | QRAC Homes, Malaysia

July 2022 – October 2022

- Supported IT system rollout, database maintenance, first-level troubleshooting, and system testing.

Assistant Project Manager – Tech Programs | BeyondGrades & Pathfinder (Dec 2021 – May 2022)

IT & Operations Intern | Trivooz (June 2021 – November 2021)

EDUCATION

University of Dhaka, Faculty of Business Studies — Executive MBA in MIS (2026 – 2028 | In Progress)

BRAC University, Bangladesh — Master of Science in Computer Science & Engineering (2025 – 2027 | In Progress)

- Graduate research direction: AI safety, reduction of LLM hallucinations, and uncertainty calibration.

SEGi University, Malaysia — B.Sc. (Honours) in Information Technology – Software Engineering (Graduated 2023)

- Academic Performance: **First Class Honours**, CGPA **3.70 / 4.00**, Dean's List.

Bangladesh University of Professionals (BUP) — Bachelor in Economics (First Year Completed, 2019 – 2020)

- CGPA 3.33/4.00; Received merit-based transfer scholarship to SEGi University Malaysia for IT studies.

RESEARCH PROJECTS & PUBLICATIONS

Gender, Course-Type, and Academic Performance Analysis | Co-Author

- Empirical study examining factors driving undergraduate performance in Business Studies at DU using ANOVA, Linear Mixed Models (LMMs), Random Forest, XGBoost, CatBoost, and SHAP explainability. (Target: IEEE ICCIT/ICISSET).

Synaptic Replay Networks (SRNs): Dream-Phase Self-Rehearsal to Calibrate LLM Memory | Lead Researcher

- Neuro-inspired architecture proposal integrating offline replay buffers with a metacognitive risk detection head to decrease overconfident hallucinations and prevent catastrophic forgetting in language models.

Heal Here: Intelligent Mobile App for Trauma Assessment | Final-Year Capstone Project

- Designed and developed a Kotlin-based Android application for post-pandemic mental health trauma assessment, incorporating structured assessment modules and user-centered usability features.

TECHNICAL & PROFESSIONAL SKILLS

Web & Design:	HTML5, CSS3, Responsive Design, UI implementation from Figma, basic JavaScript, Cross-Browser Testing
Programming & Data:	C++, Java, Python, Jupyter, Kaggle, Machine Learning, Data Cleaning & Visualization
Platforms & Operations:	Travel OTA Platforms, SRS Documentation, Inventory & Accounting Integration, API Coordination
UI/UX & Collaboration:	Figma, Canva, Usability Testing, Interface Consistency, Cross-Functional Coordination
Productivity:	MS Excel/Access, Git/GitHub (Basic), Technical Reporting, Workflow Documentation

LEADERSHIP, AWARDS & CREATIVE PRACTICE

- **Student & Cultural Ambassador** (SEGi ICN 2022): Coordinated performance logistics, costume design, and solo choreography.
- **Volunteer** (Bishwa Sahitto Kendro): Supported book reading literacy programs across schools.
- **Classical Performer**: Trained in classical dance at Chhayanaut Shongshkriti-Bhobon.
- **Languages**: Bangla (Native), English (Fluent - Academic/Professional), Hindi (Fluent), Malay (Basic).
